

NATURE, OBJECTIVES AND PURPOSE

Fondall srl, for the year 2024, defines, documents and applies a **Quality, Safety and Environment Policy** which constitutes the foundation of the company's strategic direction.

The objectives set by Fondall srl for the year 2024 are:

- Compliance with laws and regulations regarding workplace safety, the quality of services and products and the environment in terms of sustainability and respect.
- The full satisfaction of the expectations of the customer and of all the parties involved through the continuous improvement of production and company processes, of investments that place energy saving, recycling and environmental protection as central elements and the strict application of safety standards and procedures.
- The observance, application and conduct of ethical principles such as respect for the law, responsibility and correctness as the basis for a shared development of the economy that is high-quality, safe and sustainable.

The pursuit and achievement of the Fondall objectives for 2024 come about through:

- The application, compliance and control of obligations, product conformity, workplace safety and environmental sustainability.
- The commitment, with a sustainable approach to the environment, through the exclusive use of recycled raw materials, the use of alternative energy sources and energy saving through continuous investments as well as the strict control of emissions.
- The effectiveness and efficiency of production processes and quality management, workplace safety and respect for the environment.
- The clear definition and attribution of tasks and responsibilities to support a diffused and shared approach to production, quality, safety and the environment.
- Prevention through knowledge and management of risks to support the continuous improvement of company processes.
